

BLACK HAT ASIA

Marina Mandarin Hotel, Singapore

Training 16-17 Dec 2003

Conference/Exhibition 18-19 Dec 2003

The World's Leading Technical Forum For IT & Network Security Experts

WHAT'S BLACK HAT?

Not another hacking event. It's THE internationally acclaimed event that brings together the who's-who in the IT Security industry.

Black Hat Briefings was originally founded in 1997 by Jeff Moss to fill the need of computer security professionals to better understand the security risks to their computers and information infrastructures by potential threats. To do this, the **Black Hat Briefings assembles a group of vendor neutral security professionals and let them speak candidly about the problems businesses face, and the solutions they see to those problems. No gimmicks, no sales pitches, just straight talk by people who make it their business to explore the ever changing security space.**

The Black Hat Briefings' intense sessions bring to light the security and mis-configuration problems confronting organizations and network administrators where security gets put off in lieu of constant network growth and upgrades. Our speakers discuss the strategies involved in correcting existing problems and speak towards what you can expect in the future.

With unmatched depth and focus at the heart of the computer security community, the Black Hat Briefings is positioned to be the indispensable knowledge base for smart, informed decision making and practices in the age of information technology.

2003 HIGHLIGHTS

- **Hacking competition for all training and briefing delegates**
- **For the first time - Extended Exhibition area opened to the trade**
- **Exclusive Black Hat Token to the first 500 who pre-register to attend the exhibition**
- **Lucky draw – all visitors stand to win a Sony Ericsson Mobile Phone in our daily draw**

COMMENTS FROM PREVIOUS BLACK HAT BRIEFINGS

TruSecure

"A truly unique conference, really! You will be among the hottest experts in the field. And, the audience quality is remarkable: a right mix of company executives and technical specialists, all very serious, focused, and intelligent. All in all, the previous Black Hat conference was a great success for the owners, organizers, the sponsors, and the participants."

Speaker and Sponsor - Pierre Noel, CEO, Asia Pacific

Stonesoft Corporation

"Black Hat Briefings 2000 was a professionally organized Internet Security event with renowned security professionals as speakers addressing top-quality corporate audience. Definitely value for money for attendees as well as for vendors exhibiting their products there."

Sponsor - Kai Jalonen, Regional Director, Asia Pacific

Check Point Software Technologies Ltd.

"Check Point would be pleased and privileged to be the premier technology sponsor again for the Asia Black Hat Briefings in 2001. The previous Black Hat was certainly beneficial for us. It is a serious deep knowledge conference for serious people. The no-vendor pitch format makes it even more compelling for good vendors to be involved in this unique event and be identified with not only today's technologies but also the importance of network/internet security therein."

Sponsor - Anthony Lim, Regional Director, Asia Pacific
